

Carbon Reduction Plan

Supplier name: Wyse Solutions

Published: 12/08/2025

Commitment to achieving Net Zero

Wyse Solutions is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024 (1st January to 31st December)	
Additional Details relating to the Baseline Emissions calculations.	
Wyse Solutions's reporting began in the 2024 reporting year. We are reporting against the 5 mandatory categories of Scope 3 required as part of the PPN 006 UK standard, along with Scope 1 and 2 emissions based on operational control.	
Due to the nature of our business, the entirety of our emissions are based within Scope 3 categories, namely the Business Travel associated with visiting our clients, and the homeworking emissions of our staff (reported as Commuting).	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.0
Scope 2	0.0
Scope 3 (Included Sources)	6.39 Upstream Transportation and Distribution: <0.1* Waste Generated in Operations: 0.00 Business Travel: 4.38 Staff Commuting: 2.00** Downstream Transportation and Distribution: 0.0***

	<p>*A third-party screening analysis revealed this category of emissions is immaterial to our total carbon footprint so we have not measured further.</p> <p>** This includes Homeworking emissions</p> <p>***We do not sell products, so the Downstream Transportation and Distribution category is not applicable.</p>
Total Emissions	6.39

Current Emissions Reporting

Reporting Year: 2024 (1st January to 31st December)	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.0
Scope 2	0.0
Scope 3 (Included Sources)	<p>6.39</p> <p>Upstream Transportation and Distribution: <0.1*</p> <p>Waste Generated in Operations: 0.0</p> <p>Business Travel: 4.38</p> <p>Staff Commuting: 2.00**</p> <p>Downstream Transportation and Distribution: 0.0***</p> <p>*A third-party screening analysis revealed this category of emissions is immaterial to our total carbon footprint so we have not measured further.</p> <p>** This includes Homeworking emissions</p> <p>***We do not sell products, so the Downstream Transportation and Distribution category is not applicable.</p>
Total Emissions	6.39

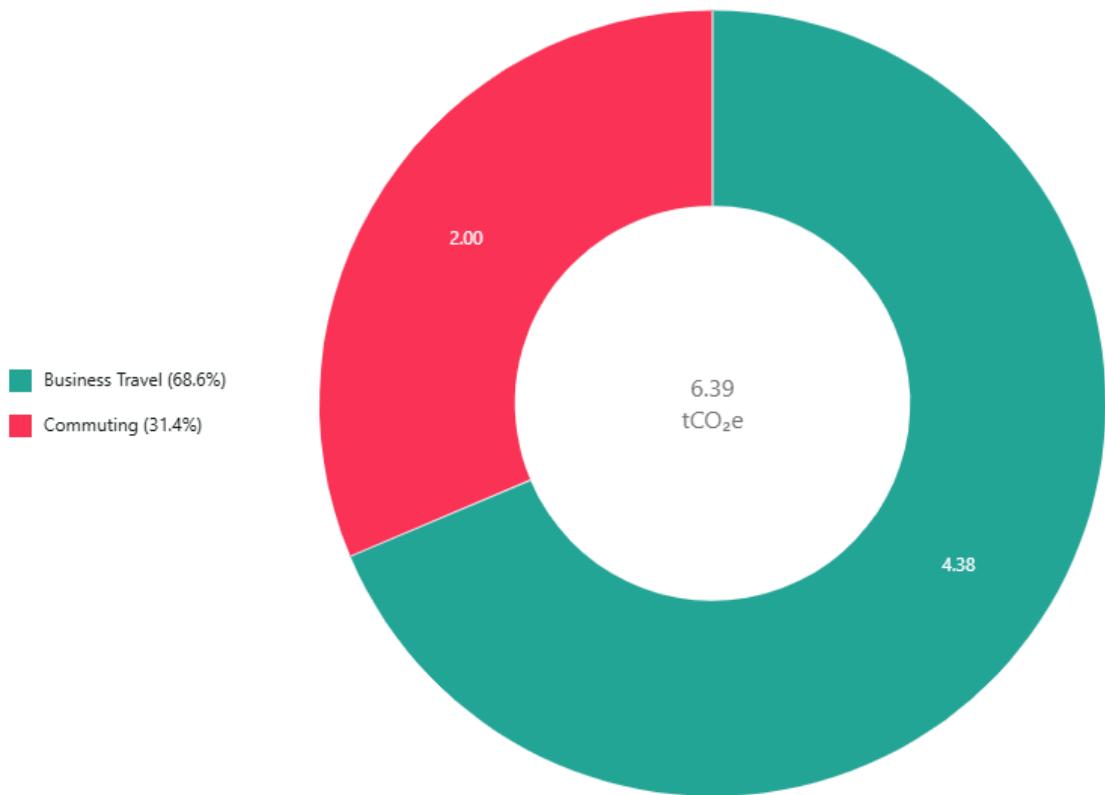

Emissions reduction targets

Wyse Solutions has committed to a long-term target of achieving net zero by 2050

In practice, this equates to a 90% absolute reduction in Scope 1, 2 and 3 emissions by 2050 from our 2024 baseline. The remaining 10% of emissions will be balanced by emissions removals to achieve net zero.

Carbon Reduction Projects

Fossil emissions by activity (tCO₂e)

Wyse Solutions is committed to taking action to bring down our emissions in-line with our near-term and long-term targets. Projects currently being delivered or under consideration in this reporting period include:

- **Digital remote working:** We will look to maintain our remote-first business model by encouraging working from home and choosing to conduct virtual meetings with stakeholders rather than travel.
- **Business travel:** Locally, we will encourage active travel and use of public transport. For any longer travel required in future, we will encourage use of fuel-efficient and/or electric vehicles and avoid flying.
- **Energy efficiency and waste:** Taking steps to minimise energy usage and waste by engaging with team members to identify and implement efficiency improvements and routines in their day-to-day work from home.
- **Measurement and metrics:** Continuing to measure our emissions annually and put practices in place to continually improve data quality, including recording all business travel and more closely monitoring energy usage while homeworking. Longer-term, we will seek to expand our measurement of Scope 3 categories to better understand our wider carbon footprint.
- **Social Value:** Exploring opportunities to increase our social value through environmental and other activities, including engaging with our local community.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
